

Visual AI Platform Packages for K-12 Schools

Entry

5 OnWatch (Watchlist Alerting) and OnAccess (Touchless Access Control) licenses for schools to be deployed at the main entrance and/or other entrances, and high-interest areas (labs/teacher's room, etc.).

This package will provide Access Control, alerts on unauthorized people trying to enter the school, domestic violence offenders, non-custodial parents and more.

A minimal server specification with 1 GPU card will be required.

Basic

10 OnWatch and OnAccess licenses for schools to be deployed at the main entrance and/or other entrances, and high-interest areas (labs/teacher's room, etc.).

This package will provide Access Control, alerts on unauthorized people trying to enter the school, domestic violence offenders, non-custodial parents and more.

A minimal server specification with 1 GPU card will be required.

Enhanced

20 OnWatch and OnAccess licenses to be deployed at sports grounds, locker areas and additional places + Forensic license for retrospective investigations of incidents + OnWatch Remote licenses to be used by school personnel as required.

Services will mirror the offerings mentioned in the Basic package, as well as forensic capabilities to investigate incidents retroactively and from offline footage; the ability to use the mobile version in real-time at school events and other scenarios; and contact-tracing across all cameras.

An edge server with 2 GPU cards will be required.
